PROFESSIONAL SUMMARY

Detail-oriented Data Analyst with hands-on internship experience transforming raw datasets into actionable business insights using SQL, Python (Pandas, NumPy), Power BI, and Excel. Skilled in data cleaning, exploratory data analysis (EDA), KPI dashboard design, and automated reporting pipelines — consistently delivering measurable improvements in reporting accuracy and operational efficiency. Holds an MBA in Finance & Marketing, bringing strong business acumen to data-driven decision-making.

TECHNICAL SKILLS

Languages	Python (Pandas, NumPy), SQL, MySQL
BI & Reporting	Power BI (DAX, KPI Dashboards), Excel (Pivot Tables, XLOOKUP, INDEX-MATCH, Charts)
Analytics	Exploratory Data Analysis (EDA), Data Cleaning & Transformation, Statistical Analysis
ML & Tools	Scikit-learn, Regression, Classification, Supervised & Unsupervised Learning, Kaggle
Soft Skills	Data Storytelling, Business Acumen, Cross-functional Collaboration, Communication

WORK EXPERIENCE

Data Analyst Intern | WsCube Tech, Jodhpur, Rajasthan *Sep 2025 – Feb 2026*

- Analysed 5+ real business datasets covering sales, customer behaviour, and operations — delivering insights that directly informed cross-departmental strategy.
- Cleaned and validated large datasets using SQL, Python, and Excel, improving data accuracy by ~30% and ensuring consistency across reporting pipelines.
- Designed and deployed 3+ interactive Power BI dashboards to monitor KPIs including sales performance, customer trends, and operational metrics.
- Automated weekly and monthly reporting workflows, reducing manual reporting effort by 60% and cutting turnaround time significantly.
- Conducted EDA and presented data-driven visualisations to both technical and non-technical stakeholders, supporting business growth decisions.

PROJECTS

Myntra Apparel Sales Analysis | *Excel | XLOOKUP · INDEX-MATCH · COUNTIF · AVERAGEIF · Pivot Tables* **View on GitHub**

- **Business problem:** Identified pricing inefficiencies and demand gaps across 1,000+ Myntra apparel SKUs by analysing discounts, ratings, and size availability.
- Found that high discounts do not correlate with top ratings; recommended a targeted discount strategy to optimise inventory management.

NYSE Financial Market Analysis Capstone | *SQL | Python | Power BI* **View on GitHub**

- **Business problem:** Analysed NYSE stock data to assess company performance, sector volatility, and investment risk.
- Built an interactive Power BI dashboard tracking returns, volatility, and sector comparisons; applied SQL and Python analysis to support investment decisions.

Amazon Sales Dataset Analysis | *SQL | Joins · Aggregations · Subqueries · Window Functions* **View on GitHub**

- **Business problem:** Analysed a multi-category Amazon sales dataset using SQL to uncover product performance trends, revenue drivers, and category-level demand patterns.
- Wrote complex SQL queries (joins, subqueries, window functions) to segment top-selling products, track regional sales, and identify high-return categories for inventory and pricing decisions.

Audible Audiobook Data Analysis | *Excel | Pivot Tables · COUNTIF · AVERAGEIF · Text Functions · Data Cleaning* **View on GitHub**

- **Business problem:** Examined Audible audiobook data to identify listener engagement patterns, pricing behaviour, and top-performing genres and authors across a large catalogue.
- Cleaned and standardised the dataset using advanced Excel functions; built pivot-table visualisations showing price does not strongly predict ratings, guiding a more customer-centric catalogue strategy.

EDUCATION

MBA — Finance & Marketing | Vyas Institute of Management, Bikaner Technical University, Jodhpur *2021 – 2024*

B.Com (Hons) — Banking & Financial Economics | Jai Narain Vyas University (JNVU), Jodhpur *2018 – 2021*

CERTIFICATIONS

SQL (Basic, Intermediate)- HackerRank (Apr 2026) | Data Analyst , Python , SQL , Excel — OneRoadmap (Apr 2026)
