PROFESSIONAL SUMMARY

Detail-oriented Data Analyst with hands-on internship experience transforming raw datasets into actionable business insights using SQL, Python (Pandas, NumPy), Power BI, and Excel. Skilled in data cleaning, exploratory data analysis (EDA), KPI dashboard design, and automated reporting pipelines — consistently delivering measurable improvements in reporting accuracy and operational efficiency. Holds an MBA in Finance & Marketing, bringing strong business acumen to data-driven decision-making.

TECHNICAL SKILLS

Languages Python (Pandas, NumPy), MySQL
BI & Reporting Power BI (DAX, KPI Dashboards), Excel (Pivot Tables, XLOOKUP, INDEX-MATCH, Charts)
Analytics Exploratory Data Analysis (EDA), Data Cleaning & Transformation, Statistical Analysis
ML & Tools Scikit-learn, Regression, Classification, Supervised & Unsupervised Learning
Soft Skills Analytical Thinking, Problem Solving, Data Storytelling, Adaptability

WORK EXPERIENCE

Data Analytics Training & Projects — WsCube Tech Sep 2025 – Feb 2026

- Analysed 5+ real business datasets covering sales, customer behaviour, and operations — delivering insights that directly informed cross-departmental strategy.
- Cleaned and validated large datasets using SQL, Python, and Excel, improving data accuracy by ~30% and ensuring consistency across reporting pipelines.
- Designed interactive Power BI dashboards to monitor KPIs including sales performance, customer trends, and operational metrics.
- Automated weekly and monthly reporting workflows, reducing manual reporting effort by 60% and cutting turnaround time significantly.
- Conducted EDA and created data-driven visualisations to identify trends and support data driven business decision making.

PROJECTS

NYSE Financial Market Analysis Capstone | SQL | Python | Power BI [View on GitHub](#)

- Business problem: Analysed NYSE stock data to assess company performance, sector volatility, and investment risk.
- Built an interactive Power BI dashboard tracking returns, volatility, and sector comparisons; applied SQL and Python analysis to support investment decisions.

Myntra Apparel Sales Analysis | Excel | XLOOKUP · INDEX-MATCH · COUNTIF · AVERAGEIF · Pivot Tables [View on GitHub](#)

- Business problem: Identified pricing inefficiencies and demand gaps across 1,000+ Myntra apparel SKUs by analysing discounts, ratings, and size availability.
- Found that high discounts do not correlate with top ratings; recommended a targeted discount strategy to optimise inventory management.

Amazon Sales Dataset Analysis | SQL | Joins · Aggregations · Subqueries · Window Functions [View on GitHub](#)

- Business problem: Analysed a multi-category Amazon sales dataset using SQL to uncover product performance trends, revenue drivers, and category-level demand patterns.
- Wrote complex SQL queries (joins, subqueries, window functions) to segment top-selling products, track regional sales, and identify high-return categories for inventory and pricing decisions.

Supermarket Billing System | Python | Dictionaries · Loops · Conditional Logic · F-strings · datetime [View on GitHub](#)

- Business problem: Developed a Python-based retail automation system to streamline the supermarket checkout process and eliminate manual billing errors.
- Automated price calculations with dynamic 10% bulk discounts for bills exceeding ₹2,000 and generated professional time-stamped digital receipts using datetime module and F-string formatting.

EDUCATION

MBA — Finance & Marketing | Vyas Institute of Management, Bikaner Technical University, Jodhpur 2021 – 2024

B.Com (Hons) — Banking & Financial Economics | Jai Narain Vyas University (JNVU), Jodhpur 2018 – 2021

CERTIFICATIONS

SQL (Basic, Intermediate) — HackerRank (Apr 2026) | Data Analyst, Python, SQL, Excel — OneRoadmap (Apr 2026)

Data Analytics Job Simulation — Deloitte Australia (Forage) • Data Analytics — WsCubeTech • Generative AI Workshop — Growth School • AI Tools Workshop — be10x
